SENATE LAW, PUBLIC SAFETY AND DEFENSE COMMITTEE

STATEMENT TO

SENATE, No. 3136

with Senate committee amendments

STATE OF NEW JERSEY

DATED: JANUARY 26, 1989

The Senate Law, Public Safety and Defense Committee reports favorably Senate Bill 3136 with amendments.

As amended, this bill changes R.S.43:17-9 to require that individuals furnish evidence of good health at the time they become eligible for membership in the New Jersey State Firemen's Association.

The purpose of this bill is to address the finding of the Law Division of the Superior Court in a recent Bergen County case, Szabo v. New Jersey State Firemen's Association (Docket No. C1962-87) which overturned the association's longstanding practice of requiring all new members to pass an appropriate physical examination. In that case, the court determined that all firemen who are admitted into a municipally controlled fire company are, by virtue of that action, automatically members of the New Jersey State Firemen's Association and, therefore, the association could not require, as an additional condition for membership, a physical examination or other evidence of good health.

According to the sponsor, this bill is essential to preserve and protect the integrity of the funds that the association has available for indigent and needy firemen and their families and that are paid as death benefits.

In addition, the committee amended the bill to require that the person who is a firefighter with a fire engine, hook and ladder, hose and supply company, fire association, or fire department under the supervision or control of a municipality be between 18 and 40 years old at the time of eligibility for membership in the New Jersey State Firemen's Association.
