STATEMENT

Present law provides an insufficient number of physicians for the medical services required by the Division of State Police and results in a substantial loss in man hours spent traveling to and from physicians' offices. Also, additional medical personnel will be required for the new State Police Academy to be opened in Sea Girt in September, 1970.

This bill will provide the expeditious medical attention necessary to a training facility and also result in a substantial saving in travel time for personnel requiring such attention.

is not enacted and is intended to be omitted in the law.
