P.L. 2007, CHAPTER 152, *approved August 21, 2007*Assembly, No. 2693

1 AN ACT concerning the industrial use of certain chemicals and 2 supplementing chapter 35 of Title 2C of the New Jersey Statutes.

BE IT ENACTED by the Senate and General Assembly of the State of New Jersey:

1. a. For the purposes of this section:

"Finished product" means a product: (1) that does not contain an industrial use chemical or from which an industrial chemical cannot be readily extracted or readily synthesized and (2) which is not sold for human consumption.

"Industrial distribution" means any process or operation necessary for distributing an industrial product, including, but not limited to, wholesaling, delivery or transport, and storage.

"Industrial product" means a non-drug, non-controlled finished product that is not for human consumption.

"Industrial use chemical" means gamma butyrolactone or 1,4-butanedoil.

"Industrial use chemical manufacturer" means a person who: (1) is involved in the manufacture of an industrial chemical for use in the manufacture of an industrial product; (2) provides that industrial use chemical to an industrial use chemical distributor or a manufacturer of an industrial product and (3) is in compliance with any requirements to register with the United States Drug Enforcement Administration as a List I Chemical registrant.

"Industrial use chemical distributor" means a person who: (1) is involved in the industrial distribution of an industrial use chemical and (2) is in compliance with any requirements to register with the United States Drug Enforcement Administration as a List I Chemical registrant.

"Manufacturer of an industrial product" means a person who is involved in any process or operation necessary for manufacturing an industrial product in which that person acquires an industrial use chemical from an industrial use chemical manufacturer or an industrial use chemical distributor and who possesses that substance solely for use in the manufacture of an industrial product.

- b. An industrial use chemical shall not be deemed a controlled dangerous substance within the meaning of N.J.S.2C:35-2 when that substance is in the possession of:
 - (1) An industrial use chemical manufacturer;
- (2) An industrial use chemical distributor;
- 42 (3) A manufacturer of an industrial product; or
- 43 (4) A person possessing a finished product.
- c. This section shall not apply to:

- (1) An industrial use chemical manufacturer who sells, delivers or otherwise distributes an industrial use chemical to a person who is not an industrial use chemical distributor or a manufacturer of an industrial product;
- (2) An industrial use chemical distributor who sells, delivers or otherwise distributes an industrial use chemical to a person who is not an industrial use chemical distributor or a manufacturer of an industrial product;
- (3) A person who extracts or synthesizes an industrial use chemical from a finished product or a person who extracts or synthesizes an industrial use chemical from any product or material, unless that extraction or synthesis is authorized by law; or
- (4) A person whose possession of an industrial use chemical is not in compliance with the provisions of subsection b. of this section or whose possession of that substance is not specifically authorized by law.
- d. (1) There shall be a permissive inference that a person to whom an industrial use chemical is sold, delivered or otherwise distributed in a quantity of 10 gallons or less is not an industrial use chemical distributor or a manufacturer of an industrial product.
- (2) There shall be a permissive inference that a person who possesses an industrial use chemical in a quantity of one gallon or less is not an industrial use chemical manufacturer, an industrial use chemical distributor, a manufacturer of an industrial product or a person possessing a finished product, and is a person whose possession of the industrial use chemical is not specifically authorized by law.
- (3) The inferences established in paragraphs (1) and (2) of this subsection shall not apply to the distribution or possession of sample quantities for the purpose of conducting chemical research, chemical quality assurance testing or industrial product or applications development.
- 2. This act shall take effect on the first day of the fourth month following enactment.

STATEMENT

This bill provides that an industrial use chemical, which is defined as gamma butyrolactone (GBL) and 1,4-butanediol (BDO), shall not be deemed a controlled dangerous substance (CDS) within the meaning of the "Comprehensive Drug Reform Act of 1987," P.L.1987, c.106 (C.2C:35-1 et seq.) when it is the possession of an industrial use chemical manufacturer, an industrial use chemical distributor, a manufacturer of an industrial product or a person possessing a finished product.

The bill specifically identifies the types of chemical and industrial products afforded an exemption and prescribes the qualifying criteria for the manufacturers and distributors who may lawfully possess GBL and BDO for industrial uses.

The bill provides that the CDS exemption is not applicable to an industrial use chemical manufacturer or distributor who sells, delivers or otherwise distributes an industrial use chemical to a person who is not an industrial use chemical distributor or a manufacturer of an industrial product or to a person who extracts or synthesizes an industrial use chemical from a finished product or from any product or material unless authorized by law, or to a person whose possession of an industrial use chemical does not comply with the act or is not specifically authorized by law.

Finally, the bill establishes permissive inferences related to the manufacture, distribution, dispensing or possession of small quantities of industrial use chemicals which are inconsistent with the legitimate industrial use of such chemicals, specifically 10 gallons or less in the case of manufacturing, distribution or dispensing; and one gallon or less in the case of possession. This provision provides a permissive inference that a person who is sold, takes delivery or otherwise receives an industrial use chemical in a quantity of 10 gallons or less is not an industrial use chemical distributor or the manufacturer of an industrial product. Similarly, the bill provides a permissive inference that a person who possesses one gallon or less of an industrial use chemical is not in compliance with the provisions of the law authorizing possession by an industrial use chemical manufacturer, industrial use chemical distributor, manufacturer of an industrial product or a person possessing a finished product and, therefore, that the person's possession of industrial use chemicals is not specifically authorized by law.

1. a. For the purposes of this section:

"Finished product" means a product: (1) that does not contain an industrial use chemical or from which an industrial chemical cannot be readily extracted or readily synthesized and (2) which is not sold for human consumption.

"Industrial distribution" means any process or operation necessary for distributing an industrial product, including, but not limited to, wholesaling, delivery or transport, and storage.

"Industrial product" means a non-drug, non-controlled finished product that is not for human consumption.

"Industrial use chemical" means gamma butyrolactone or 1,4-butanedoil.

"Industrial use chemical manufacturer" means a person who: (1) is involved in the manufacture of an industrial chemical for use in the manufacture of an industrial product; (2) provides that industrial use chemical to an industrial use chemical distributor or a manufacturer of an industrial product and (3) is in compliance with any requirements to register with the United States Drug Enforcement Administration as a List I Chemical registrant.

"Industrial use chemical distributor" means a person who: (1) is involved in the industrial distribution of an industrial use chemical and (2) is in compliance with any requirements to register with the United States Drug Enforcement Administration as a List I Chemical registrant.

"Manufacturer of an industrial product" means a person who is involved in any process or operation necessary for manufacturing an industrial product in which that person acquires an industrial use chemical from an industrial use chemical manufacturer or an industrial use chemical distributor and who possesses that substance solely for use in the manufacture of an industrial product.

- b. An industrial use chemical shall not be deemed a controlled dangerous substance within the meaning of N.J.S.2C:35-2 when that substance is in the possession of:
 - (1) An industrial use chemical manufacturer;
 - (2) An industrial use chemical distributor;
 - (3) A manufacturer of an industrial product; or
- (4) A person possessing a finished product.
- c. This section shall not apply to:
- 45 (1) An industrial use chemical manufacturer who sells, delivers 46 or otherwise distributes an industrial use chemical to a person who 47 is not an industrial use chemical distributor or a manufacturer of an 48 industrial product;

- (2) An industrial use chemical distributor who sells, delivers or otherwise distributes an industrial use chemical to a person who is not an industrial use chemical distributor or a manufacturer of an industrial product;
- (3) A person who extracts or synthesizes an industrial use chemical from a finished product or a person who extracts or synthesizes an industrial use chemical from any product or material, unless that extraction or synthesis is authorized by law; or
- (4) A person whose possession of an industrial use chemical is not in compliance with the provisions of subsection b. of this section or whose possession of that substance is not specifically authorized by law.
- d. (1) There shall be a permissive inference that a person to whom an industrial use chemical is sold, delivered or otherwise distributed in a quantity of 10 gallons or less is not an industrial use chemical distributor or a manufacturer of an industrial product.
- (2) There shall be a permissive inference that a person who possesses an industrial use chemical in a quantity of one gallon or less is not an industrial use chemical manufacturer, an industrial use chemical distributor, a manufacturer of an industrial product or a person possessing a finished product, and is a person whose possession of the industrial use chemical is not specifically authorized by law.
- (3) The inferences established in paragraphs (1) and (2) of this subsection shall not apply to the distribution or possession of sample quantities for the purpose of conducting chemical research, chemical quality assurance testing or industrial product or applications development.
- 2. This act shall take effect on the first day of the fourth month following enactment.

STATEMENT

This bill provides that an industrial use chemical, which is defined as gamma butyrolactone (GBL) and 1,4-butanediol (BDO), shall not be deemed a controlled dangerous substance (CDS) within the meaning of the "Comprehensive Drug Reform Act of 1987," P.L.1987, c.106 (C.2C:35-1 et seq.) when it is the possession of an industrial use chemical manufacturer, an industrial use chemical distributor, a manufacturer of an industrial product or a person possessing a finished product.

The bill specifically identifies the types of chemical and industrial products afforded an exemption and prescribes the qualifying criteria for the manufacturers and distributors who may lawfully possess GBL and BDO for industrial uses.

The bill provides that the CDS exemption is not applicable to an industrial use chemical manufacturer or distributor who sells, delivers or otherwise distributes an industrial use chemical to a person who is not an industrial use chemical distributor or a manufacturer of an industrial product or to a person who extracts or synthesizes an industrial use chemical from a finished product or from any product or material unless authorized by law, or to a person whose possession of an industrial use chemical does not comply with the act or is not specifically authorized by law.

Finally, the bill establishes permissive inferences related to the manufacture, distribution, dispensing or possession of small quantities of industrial use chemicals which are inconsistent with the legitimate industrial use of such chemicals, specifically 10 gallons or less in the case of manufacturing, distribution or dispensing; and one gallon or less in the case of possession. This provision provides a permissive inference that a person who is sold, takes delivery or otherwise receives an industrial use chemical in a quantity of 10 gallons or less is not an industrial use chemical distributor or the manufacturer of an industrial product. Similarly, the bill provides a permissive inference that a person who possesses one gallon or less of an industrial use chemical is not in compliance with the provisions of the law authorizing possession by an industrial use chemical manufacturer, industrial use chemical distributor, manufacturer of an industrial product or a person possessing a finished product and, therefore, that the person's possession of industrial use chemicals is not specifically authorized by law.

ASSEMBLY LAW AND PUBLIC SAFETY COMMITTEE

STATEMENT TO

ASSEMBLY, No. 2693

STATE OF NEW JERSEY

DATED: JUNE 19, 2006

The Assembly Law and Public Safety Committee reports favorably Assembly Bill No. 2693.

Assembly Bill No. 2693 provides that an industrial use chemical, which is defined as gamma butyrolactone (GBL) and 1,4-butanediol (BDO), shall not be deemed a controlled dangerous substance (CDS) within the meaning of the "Comprehensive Drug Reform Act of 1987," P.L.1987, c.106 (C.2C:35-1 et seq.) when it is the possession of an industrial use chemical manufacturer, an industrial use chemical distributor, a manufacturer of an industrial product or a person possessing a finished product.

The bill specifically identifies the types of chemical and industrial products afforded an exemption and prescribes the qualifying criteria for the manufacturers and distributors who may lawfully possess GBL and BDO for industrial uses.

The bill provides that the CDS exemption is not applicable to an industrial use chemical manufacturer or distributor who sells, delivers or otherwise distributes an industrial use chemical to a person who is not an industrial use chemical distributor or a manufacturer of an industrial product or to a person who extracts or synthesizes an industrial use chemical from a finished product or from any product or material unless authorized by law, or to a person whose possession of an industrial use chemical does not comply with the act or is not specifically authorized by law.

Finally, the bill establishes permissive inferences related to the manufacture, distribution, dispensing or possession of small quantities of industrial use chemicals which are inconsistent with the legitimate industrial use of such chemicals, specifically 10 gallons or less in the case of manufacturing, distribution or dispensing; and one gallon or less in the case of possession. This provision provides a permissive inference that a person who is sold, takes delivery or otherwise receives an industrial use chemical in a quantity of 10 gallons or less is not an industrial use chemical distributor or the manufacturer of an industrial product. Similarly, the bill provides a permissive inference that a person who possesses one gallon or less of an industrial use chemical is not in compliance with the provisions of the law authorizing possession by an industrial use chemical manufacturer, industrial use chemical distributor, manufacturer of an industrial

product or a person possessing a finished product and, therefore, that the person's possession of industrial use chemicals is not specifically authorized by law.

SENATE LAW AND PUBLIC SAFETY AND VETERANS' AFFAIRS COMMITTEE

STATEMENT TO

ASSEMBLY, No. 2693

STATE OF NEW JERSEY

DATED: MARCH 15, 2007

The Senate Law and Public Safety and Veterans' Affairs Committee reports favorably Assembly Bill No. 2693.

Assembly Bill No. 2693 provides that an industrial use chemical, which is defined as gamma butyrolactone (GBL) and 1,4-butanediol (BDO), shall not be deemed a controlled dangerous substance (CDS) within the meaning of the "Comprehensive Drug Reform Act of 1987," P.L.1987, c.106 (C.2C:35-1 et seq.) when it is the possession of an industrial use chemical manufacturer, an industrial use chemical distributor, a manufacturer of an industrial product or a person possessing a finished product.

The bill specifically identifies the types of chemical and industrial products afforded an exemption and prescribes the qualifying criteria for the manufacturers and distributors who may lawfully possess GBL and BDO for industrial uses.

The bill provides that the CDS exemption is not applicable to an industrial use chemical manufacturer or distributor who sells, delivers or otherwise distributes an industrial use chemical to a person who is not an industrial use chemical distributor or a manufacturer of an industrial product or to a person who extracts or synthesizes an industrial use chemical from a finished product or from any product or material unless authorized by law, or to a person whose possession of an industrial use chemical does not comply with the act or is not specifically authorized by law.

Finally, the bill establishes permissive inferences related to the manufacture, distribution, dispensing or possession of small quantities of industrial use chemicals which are inconsistent with the legitimate industrial use of such chemicals, specifically 10 gallons or less in the case of manufacturing, distribution or dispensing; and one gallon or less in the case of possession. This provision provides a permissive inference that a person who is sold, takes delivery or otherwise receives an industrial use chemical in a quantity of 10 gallons or less is not an industrial use chemical distributor or the manufacturer of an industrial product. Similarly, the bill provides a permissive inference that a person who possesses one gallon or less of an industrial use chemical is not in compliance with the provisions of the law

authorizing possession by an industrial use chemical manufacturer, industrial use chemical distributor, manufacturer of an industrial product or a person possessing a finished product and, therefore, that the person's possession of industrial use chemicals is not specifically authorized by law.

As reported by the committee, this bill is identical to Senate Bill No. 2254, also reported by the committee on this same date.

1. a. For the purposes of this section:

"Finished product" means a product: (1) that does not contain an industrial use chemical or from which an industrial chemical cannot be readily extracted or readily synthesized and (2) which is not sold for human consumption.

"Industrial distribution" means any process or operation necessary for distributing an industrial product, including, but not limited to, wholesaling, delivery or transport, and storage.

"Industrial product" means a non-drug, non-controlled finished product that is not for human consumption.

"Industrial use chemical" means gamma butyrolactone or 1,4-butanedoil.

"Industrial use chemical manufacturer" means a person who: (1) is involved in the manufacture of an industrial chemical for use in the manufacture of an industrial product; (2) provides that industrial use chemical to an industrial use chemical distributor or a manufacturer of an industrial product and (3) is in compliance with any requirements to register with the United States Drug Enforcement Administration as a List I Chemical registrant.

"Industrial use chemical distributor" means a person who: (1) is involved in the industrial distribution of an industrial use chemical and (2) is in compliance with any requirements to register with the United States Drug Enforcement Administration as a List I Chemical registrant.

"Manufacturer of an industrial product" means a person who is involved in any process or operation necessary for manufacturing an industrial product in which that person acquires an industrial use chemical from an industrial use chemical manufacturer or an industrial use chemical distributor and who possesses that substance solely for use in the manufacture of an industrial product.

- b. An industrial use chemical shall not be deemed a controlled dangerous substance within the meaning of N.J.S.2C:35-2 when that substance is in the possession of:
 - (1) An industrial use chemical manufacturer;
 - (2) An industrial use chemical distributor;
 - (3) A manufacturer of an industrial product; or
- (4) A person possessing a finished product.
- c. This section shall not apply to:
- 45 (1) An industrial use chemical manufacturer who sells, delivers 46 or otherwise distributes an industrial use chemical to a person who 47 is not an industrial use chemical distributor or a manufacturer of an 48 industrial product;

- (2) An industrial use chemical distributor who sells, delivers or otherwise distributes an industrial use chemical to a person who is not an industrial use chemical distributor or a manufacturer of an industrial product;
 - (3) A person who extracts or synthesizes an industrial use chemical from a finished product or a person who extracts or synthesizes an industrial use chemical from any product or material, unless that extraction or synthesis is authorized by law; or
 - (4) A person whose possession of an industrial use chemical is not in compliance with the provisions of subsection b. of this section or whose possession of that substance is not specifically authorized by law.
 - d. (1) There shall be a permissive inference that a person to whom an industrial use chemical is sold, delivered or otherwise distributed in a quantity of 10 gallons or less is not an industrial use chemical distributor or a manufacturer of an industrial product.
 - (2) There shall be a permissive inference that a person who possesses an industrial use chemical in a quantity of one gallon or less is not an industrial use chemical manufacturer, an industrial use chemical distributor, a manufacturer of an industrial product or a person possessing a finished product, and is a person whose possession of the industrial use chemical is not specifically authorized by law.
 - (3) The inferences established in paragraphs (1) and (2) of this subsection shall not apply to the distribution or possession of sample quantities for the purpose of conducting chemical research, chemical quality assurance testing or industrial product or applications development.
 - 2. This act shall take effect on the first day of the fourth month following enactment.

STATEMENT

This bill provides that an industrial use chemical, which is defined as gamma butyrolactone (GBL) and 1,4-butanediol (BDO), shall not be deemed a controlled dangerous substance (CDS) within the meaning of the "Comprehensive Drug Reform Act of 1987," P.L.1987, c.106 (C.2C:35-1 et seq.) when it is the possession of an industrial use chemical manufacturer, an industrial use chemical distributor, a manufacturer of an industrial product or a person possessing a finished product.

The bill specifically identifies the types of chemical and industrial products afforded an exemption and prescribes the qualifying criteria for the manufacturers and distributors who may lawfully possess GBL and BDO for industrial uses.

The bill provides that the CDS exemption is not applicable to an industrial use chemical manufacturer or distributor who sells, delivers or otherwise distributes an industrial use chemical to a person who is not an industrial use chemical distributor or a manufacturer of an industrial product or to a person who extracts or synthesizes an industrial use chemical from a finished product or from any product or material unless authorized by law, or to a person whose possession of an industrial use chemical does not comply with the act or is not specifically authorized by law.

Finally, the bill establishes permissive inferences related to the manufacture, distribution, dispensing or possession of small quantities of industrial use chemicals which are inconsistent with the legitimate industrial use of such chemicals, specifically 10 gallons or less in the case of manufacturing, distribution or dispensing; and one gallon or less in the case of possession. This provision provides a permissive inference that a person who is sold, takes delivery or otherwise receives an industrial use chemical in a quantity of 10 gallons or less is not an industrial use chemical distributor or the manufacturer of an industrial product. Similarly, the bill provides a permissive inference that a person who possesses one gallon or less of an industrial use chemical is not in compliance with the provisions of the law authorizing possession by an industrial use chemical manufacturer, industrial use chemical distributor, manufacturer of an industrial product or a person possessing a finished product and, therefore, that the person's possession of industrial use chemicals is not specifically authorized by law.

SENATE LAW AND PUBLIC SAFETY AND VETERANS' AFFAIRS COMMITTEE

STATEMENT TO

SENATE, No. 2254

STATE OF NEW JERSEY

DATED: MARCH 15, 2007

The Senate Law and Public Safety and Veterans' Affairs Committee reports favorably Senate Bill No. 2254.

This bill provides that an industrial use chemical, which is defined as gamma butyrolactone (GBL) and 1,4-butanediol (BDO), shall not be deemed a controlled dangerous substance (CDS) within the meaning of the "Comprehensive Drug Reform Act of 1987," P.L.1987, c.106 (C.2C:35-1 et seq.) when it is the possession of an industrial use chemical manufacturer, an industrial use chemical distributor, a manufacturer of an industrial product or a person possessing a finished product.

The bill specifically identifies the types of chemical and industrial products afforded an exemption and prescribes the qualifying criteria for the manufacturers and distributors who may lawfully possess GBL and BDO for industrial uses.

The bill provides that the CDS exemption is not applicable to an industrial use chemical manufacturer or distributor who sells, delivers or otherwise distributes an industrial use chemical to a person who is not an industrial use chemical distributor or a manufacturer of an industrial product or to a person who extracts or synthesizes an industrial use chemical from a finished product or from any product or material unless authorized by law, or to a person whose possession of an industrial use chemical does not comply with the act or is not specifically authorized by law.

Finally, the bill establishes permissive inferences related to the manufacture, distribution, dispensing or possession of small quantities of industrial use chemicals which are inconsistent with the legitimate industrial use of such chemicals, specifically 10 gallons or less in the case of manufacturing, distribution or dispensing; and one gallon or less in the case of possession. This provision provides a permissive inference that a person who is sold, takes delivery or otherwise receives an industrial use chemical in a quantity of 10 gallons or less is not an industrial use chemical distributor or the manufacturer of an industrial product. Similarly, the bill provides a permissive inference that a person who possesses one gallon or less of an industrial use chemical is not in compliance with the provisions of the law

authorizing possession by an industrial use chemical manufacturer, industrial use chemical distributor, manufacturer of an industrial product or a person possessing a finished product and, therefore, that the person's possession of industrial use chemicals is not specifically authorized by law.

As reported by the committee, this bill is identical to Assembly Bill No. 2693, also reported by the committee on this same date.
